Free WiFi

airCloud Communications provides free [ad-supported] and paid [ad-free] public wireless Internet access. Our network is growing and we want you to grow with us!

It's no secret that offering wireless Internet service in your waiting area or restaurant attracts new repeat customers. By partnering with airCloud Communications your WiFi HotSpot becomes part of our growing network. Each month over 1,000 mobile computer users seek out our WiFi HotSpots and this is good news for you.

Every HotSpot on the airCloud network is listed on our HotSpot Finder exposing your business to thousands of potential customers.

But we don't stop there!

Advertising

airCloud's Retail WiFi HotSpot program includes a powerful advertising program that puts your business in front of thousands of WiFi users every month.

Our ad-delivery technology is totally unique in the industry. We insert your advertisement into each and every webpage viewed by each and every WiFi user while they are browsing.

Every ad gets premium placement—every time

Unlike print advertising, your ad is interactive allowing users to "click-through" to your website or online listing. If you don't have a website, we'll create an online listing for you.

And unlike print advertising, we won't put your advertisement in an obscure location and charge you even if no one sees it. If you pay for 10,000 views with our service your ad will be seen 10,000 times. We think that's fair and believe it's a deal that no one can beat.

We take care of installation, setup, and management of your HotSpot so you can focus on your business.
